## MAJOR PROJECTS

---

**Smart patient monitoring system - UX+UI**

Designed a user friendly platform that allows healthcare providers to easily monitor and track patient vitals and other important health metrics.

**Application to program Gel Pads - UI**

The user interface for a desktop application that program gel pads used for patient temperature management.

**User Interface Design for an automatic calibration simulator - UI**

Redesigned the User interface for a calibrator in production unit, in order to make it more simple and easy to navigate.
